

Our parent organization, Hendrick Manufacturing Company, has been in the industrial processing business since 1876 when it began as a producer of high quality perforated plate. Earlier this century, we began manufacturing profile wire screens and in 1974, Hendrick Screen Company was established in Owensboro, Kentucky to devote all of its time and resources to producing quality profile wire screens.

Our commitment in the beginning was and continues to be *customer service* and this success is based on our dedication to:

- | | |
|----------------|-----------------|
| Accessibility | Quality |
| Reliability | Performance |
| Responsiveness | Professionalism |

Our staff is knowledgeable with many employees exceeding 25 years of profile screen experience. This valued experience is what we depend on to lead us into the 21st century looking for improved performance to better serve our customers.
